Earth bar protective enclosure

TLHBS · TLHBP

The protective enclosure shields the earth bar and disconnect links from sun and rain and keeps them out of reach of unauthorised people. We supply it in two types, steel with electrostatic paint (TLHBS) and ABS plastic with IP66 protection (TLHBP), in sizes to suit the earth bar length.

- Protection from sun and rain
- Out of reach of unauthorised people
- Metal or plastic
- Dimensions to suit the earth bar length

Application and selection

When you order, give us the code and length of the earth bar or the number of links, and we will recommend an enclosure of matching size.

This document is not contractual; we may update product design, dimensions, weights and images without prior notice.
