Dimensional drawing of the galvanised earth pipe

3 inch galvanised or stainless steel pipe, 3000 and 6000 mm long, with a connection lug welded outside the top of the pipe

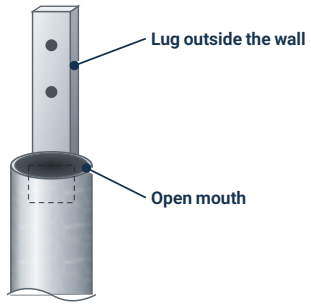

Side view

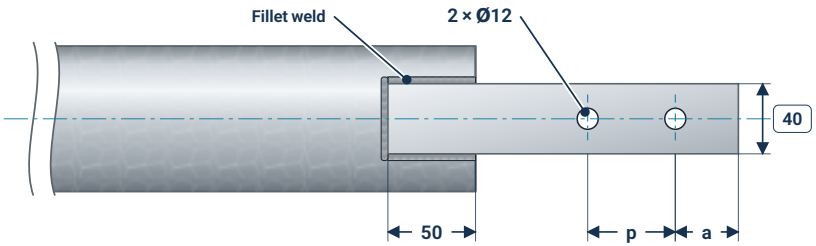

Section A-A, galvanised pipe

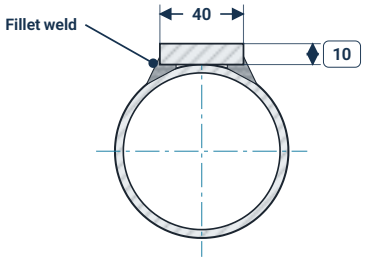

Stainless steel: 83 / 77, wall 3

Three-dimensional view of the pipe top

Front view of the lug

Section B-B, at the overlap

Earth pipe specifications

Material: Hot-dip galvanised steel, or 304L or 316 stainless steel; all in 3 inch nominal size and 3 and 6 m lengths

Section: Galvanised pipe: 83 outside diameter, 75 inside and 4 mm wall; stainless steel pipe: 83 outside diameter, 77 inside and 3 mm wall

Connection lug:200 × 40 × 10 steel strip with two 12 mm holes, outside the top of the pipe and flush against its wall; 50 mm overlap with a fillet weld around it, projecting 150 mm beyond the open round pipe mouth; a is the distance of the first hole from the lug tip and p the spacing of the two holes

Galvanised pipe coating: Hot-dip galvanised after machining and welding; zinc at least 610 g per square metre (85 microns)

Weight: From the drawing dimensions; density 7.85 for zinc-coated galvanised steel, 7.90 for 304L and 8.00 g per cubic centimetre for 316

Order code, material, length and weight

Weight (kg)	Length L (mm)	Section Ø out / Ø in / t (mm)	Nominal size	Material	Order code
24.9	3000	83 / 75 / 4	3 inches	Hot-dip galvanised steel	**HGV 3**
49.2	6000	83 / 75 / 4	3 inches	Hot-dip galvanised steel	**HGV 6**
18.5	3000	83 / 77 / 3	3 inches	Stainless steel 304L	**HSL 3**
36.4	6000	83 / 77 / 3	3 inches	Stainless steel 304L	**HSL 6**
18.7	3000	83 / 77 / 3	3 inches	Stainless steel 316	**HSM 3**
36.8	6000	83 / 77 / 3	3 inches	Stainless steel 316	**HSM 6**

Dimensions in mm; the pipe length is shown shortened with a break line.
