Foundation earthing installation details

Foundation section, foundation tap-off and expansion joint

GALVANIZED STEEL ROUND WIRE · RWG 010 · Ø10 · 78 mm² · HOT-DIP 70 µm

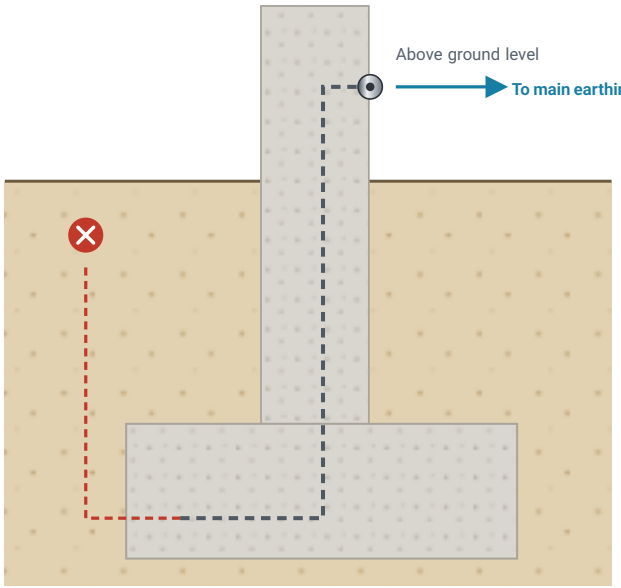

KALOT GROUP · TECHNICAL ILLUSTRATION · NOT TO SCALE

Expansion joint

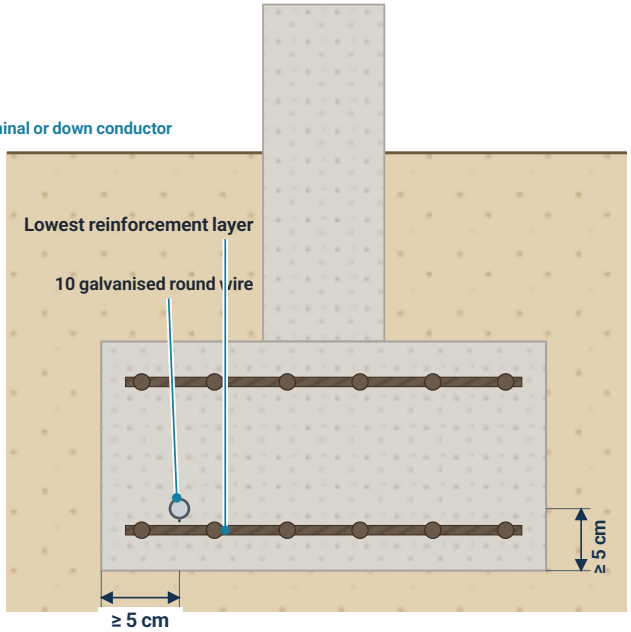

Rigid wire never crosses an expansion joint; both sides are joined outside the concrete by a flexible connector.

Foundation tap-off

The tap-off runs inside the concrete or wall into the building or above ground level; the galvanised conductor never leaves the foundation concrete straight into soil.

Section A-A: strip foundation

Wire on the lowest reinforcement layer, near the outer edge of the foundation, with at least 5 cm of concrete on all sides.

Figures are illustrative and not to scale.

We keep improving our products; please confirm final dimensions with our experts.

This document is not contractual; we may update product design, dimensions, weights and images without prior notice.
