Connection modes of the galvanised clamp for tape to earth rod and round wire

Views not to scale

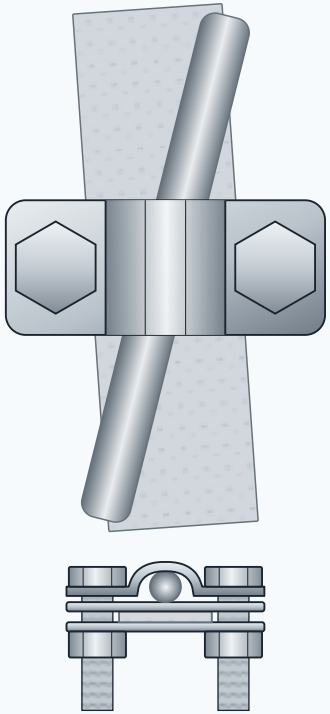

TRCG 3016

KALOT GROUP · TECHNICAL ILLUSTRATION · NOT TO SCALE

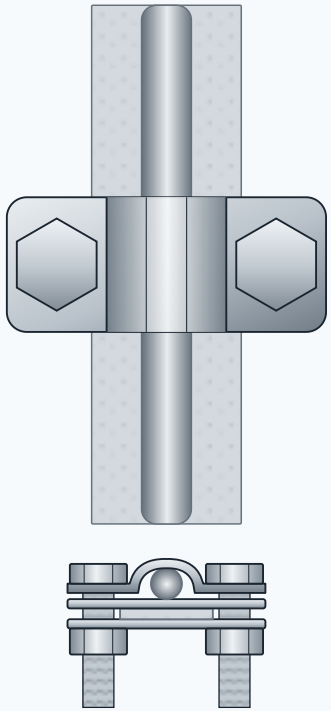

3. Tape and reinforcing bar

2. Tape and wire, at a small angle

1. Tape and wire, parallel

In all three modes the round conductor sits under the saddle of the top plate and the tape between the two flat plates, both passing between the two bolts; an angle between the conductors is only possible as far as both still fit between the bolts. Top: plan view; bottom: front view. All conductors are steel; no copper conductor is used.
