4. Two conductors on a reinforcing bar

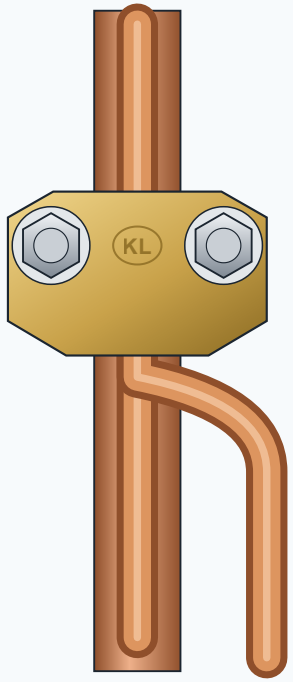

3. Two conductors at right angles to the earth rod

2. One conductor in line, one at right angles

1. Two conductors in line with the earth rod

The three-piece U clamp has two conductor levels, each with two holes: a centre hole for a conductor in line with the earth rod or reinforcing bar, and a cross hole for a conductor at right angles to it. Each conductor can pass through the clamp or end in it. The clamp fits copper, copper-bonded or stainless steel earth rods and reinforcing bars; for galvanised conductors use the galvanised U clamp.
